

NAME

ptar - a tar-like program written in perl

DESCRIPTION

ptar is a small, tar look-alike program that uses the perl module Archive::Tar to extract, create and list tar archives.

SYNOPSIS

```
ptar -c [-v] [-z] [-f ARCHIVE_FILE] FILE FILE ...
ptar -x [-v] [-z] [-f ARCHIVE_FILE]
ptar -t [-z] [-f ARCHIVE_FILE]
ptar -h
```

OPTIONS

```
x  Extract from ARCHIVE_FILE
c  Create ARCHIVE_FILE from FILE
t  List the contents of ARCHIVE_FILE
f  Name of the ARCHIVE_FILE to use. Default is './default.tar'
z  Read/Write zlib compressed ARCHIVE_FILE (not always available)
v  Print filenames as they are added or extraced from ARCHIVE_FILE
h  Prints this help message
```

SEE ALSO

tar(1), *Archive::Tar*.
